

Environmental Statement

Proud to supply Certified Timber from the World's Forests

Vincent Timber are at the fore-front of the campaign to protect the environment as illustrated by the fact that the company was only the 2nd company in the UK to be awarded Chain of Custody for CSA and SFI to cover Western Red Cedar.

Vincent Timber are members of TRADA and have appointed them as the company's auditors and advisors on their implementation of their "Chain of Custody".

Currently, Vincent Timber has Chain of Custody for:

PEFC	Programme for the Endorsement of Forest Certification
CSA	Canadian Standards Association
SFI	Sustainable Forestry Initiative

Actions by Vincent Timber

- 1. Responsibility**
The company recognises and accepts its responsibility to the global environment, its customers, suppliers and staff.
- 2. Legality**
The company is committed to purchasing its timber from well managed and above all, legal sources.
- 3.** The company will not source any timber species prohibited under appendix 1 of the convention of International trade in Endangered Species (CITES).
- 4.** We recognise that independent certification of forests and the process chain is the most useful tool in providing assurances that the timber comes from legal and well-managed forests. Vincent Timber will request and record its suppliers Chain of Custody details that relate to their production and raw material.
- 5.** Vincent Timber will avoid misleading and unsubstantiated environmental claims in relation to wood products suppliers.
- 6.** Vincent Timber purchasing is run and maintained by Jake Vincent who will ensure that environmental issues relevant to the policy are discussed regularly at the highest level of management. Staff are trained and encouraged to act in accordance with this policy.
- 7.** Vincent Timber's Chain of Custody is monitored by B.M. TRADA, which currently covers CSA, SFI, and PEFC.

CERTIFICATE OF REGISTRATION

This is to certify that

Vincent Timber Ltd
8 Montgomery Street
Sparkbrook
Birmingham
West Midlands
B11 1DU

has been audited and found to meet the requirements of standard **PEFC ST 2002:2020 Chain of Custody Certification**
As amended - www.pefc.org

Scope of certification

The purchasing, storage, processing (including outsourcing), distribution and sale of certified timber and finished timber products.

Products:
030100 - Sawtimber
050000 - Wood based panels

Raw material origin:
Certified Raw Material

Method:
Physical Separation

Certificate number:

BMT-PEFC-COC-0145

Issue number: 2023-01

Certificate start date: 21 January 2020

Certificate expiry date: 20 January 2025

Date of initial certification: 21 January 2005

Vicki Howlett

General Manager - Certification UK

Issued Office: Birmingham Training and Certification Limited is a UK Trade Mark. House, Leek, High Wycombe, Buckinghamshire, HP12 3RT. Registered Office: Birmingham Training and Certification Limited, 1st Floor, Saxon Building, 1 Hockley Square, London, EC3A 7HL, UK. Reg No. 1131746. This certificate remains the property of B.M. TRADA. This certificate and all copies or reproductions of the certificate shall be returned to B.M. TRADA or destroyed if requested. Further certification regarding the scope of this certificate and verification of the certificate is available through B.M. TRADA or as the sole auditor or its designated body. This certificate shall show no common element for a particular product, company or the certificate holder. It is the company's responsibility to ensure that the certificate holder can only be considered to be certified by the scope of this certificate when the required PEFC chain of custody is in place and verified and signed by the company. The use of the third accreditation mark indicates accreditation in respect of these activities covered by the accreditation certificate 0012.

Environmental Statement

CERTIFICATION AND CANADA'S FORESTS

Concern over diminishing national resources and the state of the environment in general has raised public and media attention around forestry. People want to know if harvested areas are being regenerated, if wildlife habitat is being protected and if the bio-diversity of the forest is being maintained.

In a global market, where a customer can be thousands of miles away, providing evidence of well managed forests is increasingly being done through independent, third party certification.

What is Certification

Certification is primarily about providing objective evidence of sustainable forestry management. It functions much like a financial audit, where independent experts verify a company's performance against a set of objective standards and procedures for sustainability.

Certification is also about meeting social and community expectations. Are companies making their plans public? Are they consulting neighbours as well as sharing the economic benefits by maintaining stable community employment? Credible certification standards include these types of considerations.

What is "Chain of Custody"?

Chain of Custody refers to the ability to track wood from the time it leaves the forest through the processing and marketing channels to the final consumer. Chain of Custody is of particular interest to buyers of manufactured product who want to verify that a certified product genuinely comes from a certified source. In some cases, labelling is being used to identify wood from a certified forest.

PEFC

The PEFC Council is an independent, non-profit, non-government organisation, founded in 1999 which promotes sustainably managed forests through independent third party certification.

The PEFC provides an assurance mechanism to purchasers of wood and paper products that they are promoting the sustainable management of forests.

PEFC is a global umbrella organisation for the assessment of, and mutual recognition of national forest certification schemes developed in a multi-stakeholder process. These national schemes build upon the inter government processes for the promotion of sustainable forest management, or services of on-going mechanism supported by 149 governments in the world covering 85% of the worlds forest areas.

CSA

Canada's National Sustainable Forest Management standard is based on international criteria for sustainable forest management and Canada's own national SFM criteria which were developed by the Canadian Council of Forest ministers approved in 1996, the CSA standard has a stringent public participation requirement and companies are required to respect national criteria for SFM at local level as well as address any additional local values. Third party evaluations such as the Council of European Paper Industries have ranked the CSA amongst the best standards in the world. CSA launched an optional Chain of Custody and labelling program in July 2001.

SFI

The Sustainable Forestry Initiative was developed by the American Forest and Paper Association for its membership, and is now available for use by any interested party through a licensing arrangement. This standard was developed for application in the U.S.A. where the vast majority of lands are privately owned and therefore there is somewhat less of an emphasis on public participation. The SFI program is a comprehensive system and performance-based standard that integrates the perpetual regeneration and harvesting of trees with the protection of Wildlife, soil and water quantities, bio-diversity and ecologically significant sights. Over the past 3 years AF & PA have strengthened the credibility of the standard by introducing a third-party certification process and an independent sustainable Forestry Board with broad representation of interests to govern SFI.
