TACTILE AND BEAUTIFUL – MADE TO LAST

LunaComp Deck is a durable and low maintenance choice for modern outdoor construction. The product is designed to stand the test of time and the varying weather conditions of the northern Europe. LunaComp maintains its attractiveness due to its unique qualities: it is weather resistant, low maintenance and has excellent dimensional stability.

For year-round use

LunaComp Deck makes it possible to use your deck all year round. Its surface is pleasant to touch and slip resistant even in wet conditions. The hollow structure can accommodate concealed cabling for lightning and heating equipment.

Pioneers in the field of ecological outdoor construction

LunaComp Deck is manufactured using 100 % recycled wood fibre. The main raw materials of the composite are thermally modified wood fibres, a by-product of Lunawood's thermal wood manufacturing, and recycled plastic polymers.

Why LunaComp Deck?

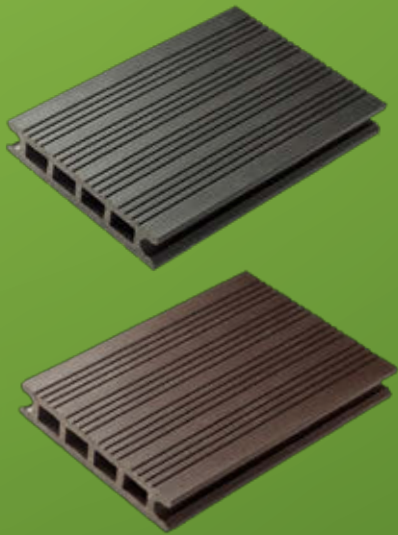

- A durable and ecological choice, contains over 60 % recycled materials
- Dries quickly after rain, does not absorb water
- Maintenance free, needs only regular cleaning
- Toxin-free
- Free from splinters and cracks found in ordinary wood – contains more wood fibre than an equivalent piece of wood!
- PVC free

LunaComp Deck is a thermowood composite completely designed and manufactured in Finland. The Association for Finnish Work has awarded LunaComp Deck with the Key Flag-symbol which represents Finnish work and products. The symbol recognises the high quality and safety of LunaComp Deck and the company's commitment to corporate responsibility.

The benefits of LunaComp Deck

- Quick to install; requires less fastening than a traditional deck
- Easy to care for, only requiring regular cleaning
- Maintains its shape and size year after year, does not become misshapen
- The hollow structure can conceal cables for lightning and heating equipment
- Little expansion and contraction due to heat and moisture
- Choice of two contemporary colours

Easy to install, easy to maintain

LunaComp makes installing your deck easier than ever. LunaComp is available with a full range of fixing accessories – clips, caps, connectors and side-strips.

The low maintenance LunaComp Deck does not require annual surface treatments, like most deck materials. You only need to clean your deck with warm water and brush or power hose according to the care instructions.
